Address: Uganda Nakivale Camp

Title of the program : Food Security and Plastic Bank

Overall program vision

- ❖ Making sure food is sufficient for all refugees at all time .
- ❖ Accessing to food that is nutritious and safe to refugees .
- ❖ Distributing at least thirty acres to vulnerable women .
- ❖ Giving seeds , manure and materials for the starts .
- ❖ Stopping plastics pollution around isingiro .
- ❖ Collecting plastics for betterment of our soil .

Description of the challenge : Due to the crisis around the world as well in refugee camps , refugees were getting the monthly food ration like rice , beans , maize , corn soya beans and oil . after food was changed to money at the cost of \$10 per person , due to the pandemic things changed completely . a refugee is getting \$3 per person . with \$3 per month none can survive . and it is bringing challenges in the household . once a reckless father goes to take that \$3 , he will finish it all drinking alcohol yet the family is suffering . apart from that farms are not given ,our soil is not too much fertilized . material for farming are not provided to people . many refugee camps are facing the double burden of hunger and undernutrition . as long as plastics do not break down naturally , they are polluting natural systems , including lake nakivale .

First project ; Increasing food production by providing acres, materials .
Reducing malnutrition rates and improving nutritious food for a specific number of households or refugees . Providing a permaculture training .

Who the program impacts : Our community will benefit through giving a permaculture training in order to know well about our soil and knowing to plant productivity . through providing thirty acres everyone will be able to feed his household and sell to get income . the program is targeting thirty households that is 400 people and more others .

Follow up steps

- ❖ Recycling plastics exchanging with some little money .

- ❖ Supporting refugees through collecting plastics .
- ❖ Creating a good environment climate .
- ❖ End poverty , stopping plastic pollution
- ❖ Creating change for refugees and all world
- ❖ In five years nakivale will be the most cleaned place in Uganda ,
- ❖ We are hoping to be connected with plastic bank .

Potential partners

- ❖ Seniors without borders (seniorer uden graenser)
- ❖ Plastic bank
- ❖ International city of peace
- ❖ Rotary club

Outcomes of the project

- ❖ Improving health in the nakivale camp
- ❖ Increasing job opportunity
- ❖ Empowerment of women in agriculture
- ❖ Greater economic stability
- ❖ Solving climate problem

How we measure success

- ❖ Goal of 10% promoting food security to vulnerable women , children and whole community .
- ❖ Making everyone at work to promote peace and body health

Initial project budget :The initial project as defined in the first steps will require \$4,000 .

Long – range program budget :This program budget will depend on assessment for the first step project plan .plastic bank will cost at least

\$6,000 in three years to come .report and outcomes will be provided by receipt and material in photos.
